COMPANY PROFILE

Founded in Hangzhou, China in 1998, Huisong Pharmaceuticals specializes in the R&D and manufacturing of premium-quality natural ingredients for world-leading companies in pharmaceutical, nutraceutical, food & beverage, and personal care industries. With a track record of 20+ years in botanical science innovation, Huisong Pharmaceuticals has transformed into a global natural ingredients company with a highly-integrated supply chain supporting a portfolio of natural products such as medicinal herbs, botanical extracts, food & vegetable ingredients, pharmaceutical drugs, TCM prescription granules, and other natural ingredients and products.

Today, Huisong has many locations across the globe and continues to innovate and advance the world of human health by following its core values: Nature, Health, Science.

OUR MISSION

"Throughout the past 40 years in the world of natural medicine, I have been grateful for the guidance and collaboration from my predecessors and partners in the industry. Today, Huisong is committed to advancing the world of health and nutrition by providing premium-quality natural ingredients with the harmonious integration of Japanese quality standards and modern manufacturing technologies. At the foundation of our business will always remain **integrity, quality, and service.**"

QUALITY GUARANTEE

FULL CAPABILITY LABORATORY

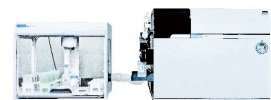

The lab is capable of independently testing 473 kinds of pesticides and other critical quality control points set by Japan, EU, US, and many other advanced markets. The lab places heavy emphasis on continuous learning and technical advancements through communication with external technical exchanges and cooperates closely with Zhejiang Drug Control Centre, Hangzhou Drug Control Centre, Eurofins, SGS, etc., and conducts comparative testing with external laboratories to improve laboratory testing ability.

PANAX GINSENG

Panax ginseng C.A. Meyer

KEY INFORMATION

Origin: **Jilin, Heilongjiang, China**

Harvest Season: **August to October**

Part Used: **Root / Stem / Tail**

BACKGROUND

Ginseng is a precious medicinal plant and is known as the "King of Herbs". The Latin name "Panax" is a combination of "Pan" (meaning "total") and "Axos" (meaning "medicine"). Modern medicine believes that ginseng has obvious effects on the nervous system, cardiovascular system, endocrine system, digestive system, reproductive system, respiratory system and surgical use.

Huisong also makes full use of its quality inspection advantages to classify and screen raw materials in order to provide customers with raw materials that meet different requirements such as JP, CP, USP, EU, EPA, EU organic, and Japanese food positive lists. Meanwhile, we can provide related processes such as cutting, powdering, extraction, and sterilization according to customer requirements.

GAP CULTIVATION

Huisong Pharmaceuticals is committed to providing stable and reliable ginseng products. To ensure the stable supply and quality of ginseng, we established a subsidiary (Jilin Huishen Pharmaceutical Co., Ltd.) in Fusong County, Jilin Province in 2013, allowing the subsidiary to use Huisong's successful experience in ginseng GAP cultivation and to build a long-term relationship with the local farmers. We supervise the entire process of ginseng breeding, cultivation, and harvesting so that we can reduce pesticide residues and heavy metals as much as possible. At the same time, we guide and strictly control the use of pesticides. In addition, during the entire planting process, Huisong Pharmaceuticals regularly samples pesticide residues and heavy metals of the ginseng to guarantee the safety of raw materials to the greatest extent.
